## Massachusetts

### Single-hand & Two-handed Fly & Spey Fishing

The **Deerfield River** offers outstanding, spring, summer and early fall fly fishing possibilities available in New England. Primarily a hatchery planted river with rainbows, browns and brookies spread from the Fife Brook Dam and through most all accessible areas into Deerfield with occasional wild trout lurking these waters. There are numerous wading areas as well as many miles of float and drift boat waters which provide a near western river experience. The Upper section boasts a tail water release into the upper and lower fly zones which can offer some great fly fishing opportunities through the heat of the summer.

The **Westfield River** is a wade fishery only. A natural spring and rain fed river that is ever changing with good fishable flows and is well stocked allowing for some of the better all around fly fishing in Western Mass for rainbows, browns, brookies and the occasional trigger trout. All branches and sections fish well depending on flows.

The **Chesterfield Gorge Section** is a great *Catch and Release Only Area* which entertains many fly rodders of all levels of experience. This is a very sensitive watershed that is directly related to runoff and rain throughout the season and may become unfishable due to low flows and then again may become a raging and flash flooding river in the matter of minutes. Both Fly and Spey Fishing outings are offered in Massachusetts due to the river sizes and terrain.

## New York

### Spey and Switch Rod Fishing

The **Salmon River** in beautiful upstate New York offers "World Class Angling" for salmon, trout, steelhead and more. The Salmon River and other nearby Lake Ontario Tributaries boast some of the most prolific runs of trophy class fish found anywhere in the Northeast. More than 11 miles of fishable water from the lower end to the top of the upper fly zone allows you to find areas that fit your style of angling.

**Spey Fishing** has become very popular on larger water ways and the Salmon River region is no different. Swinging spey flies, streamers and wets is an art that many are practicing while enjoying their day on the water. Single and multi-day outings with lodging are available. Multi-day outings are quite popular, especially during mid-week. These mid-week days may allow for more wading and floating options, covering more water and other Lake Ontario Tributaries in the region with less river traffic.

Spey Fishing consists of Spey, Switch, Skagit and Scandi Casting.

**Catch & Release Only!**

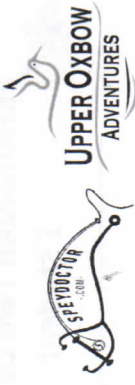

"Experience a More Traditional Style of Spey & Fly Fishing."

## Atlantic Salmon

### Hosted Trips
